DRINK MAKER

The **CROWN DRINK MAKER** is the perfect kitchen companion for any busy office or factory kitchen where high volume traffic occurs. Remarkably durable, the Crown Drink Maker can serve 20 continuous cups of boiling water, delivered from a 3.5 litre holding tank.

The polycarbonate body is easy to maintain and clean, and can readily handle the roughest treatment.

These solid units are free standing and can be easily moved for benchtop cleaning or relocation. The potential for water spillages is overcome by a large filling access point in the top of the case.

The dispenser units supply a measured amount of either Coffee, Chocolate, Soup, or whatever drink you require.
